

Michael Moore

Web Developer

Atlanta, GA | (770) 329-9086

michaelhmoore.com | github.com/michaelhmoore | linkedin.com/in/michael-h-moore | michael.moore@hey.com

Creative web developer with the ability and curiosity to learn new languages and technologies. Previously, I worked in Supply Chain, where I had exposure to Excel VBA and SQL. This small exposure to coding inspired me to pursue a career in web development.

Web Development Skills

- Debugging, JavaScript, Python, Node.js, React, Express, Redux, RESTful API, PostgreSQL, Sequelize, Bootstrap, HTML, CSS

Education

Kennesaw State University | BBA in International Business | Kennesaw, GA August 2012 – July 2017

Kennesaw State University | Minors in Coles Scholars and French & Francophone Studies August 2012 – July 2017

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA January 2021 – May 2021

- Software engineering training program covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Select Projects

ConvoCare | github.com/michaelhmoore/xxxx April 2021

- Collaborated with two team members to develop a full-stack website for mental health.
- Acted as team project manager, managing day to day activities to ensure efficient project completion. Primary development responsibilities included developing journal and thread functionality.
- ConvoCare offers resources, forums, and a personal journal page. Registered users may create, save, and edit forum threads and journal entries.
- Project built with React, Node.js, Express, PostgreSQL, HTML and CSS.

Weather or Not | github.com/michaelhmoore/xxxx April 2021

- Developed a solo React web application using an OpenWeather API
- User experience allows for searching single day and 5-day weather forecast for any City

Beer:30 | github.com/michaelhmoore/beer30 March 2021

- Worked collaboratively as a 4-person team on a full-stack web application that allows a user to customize their own six-packs of beer from an API we developed.
- Primary responsibilities included backend initialization with Node.js, Express, and Sequelize, in addition to register/login functionality and pages.
- User experience allows for the ability to login, customize their six-packs of craft beer, and save them with a title and description. The user can revisit their creations on their profile page.
- Project built with React, Node.js, Express, PostgreSQL, HTML, and CSS.

SpotifySearch | github.com/michaelhmoore/ February 2021

- Member of a 4-person development team building a web application that allows a user to login to their Spotify account and search for songs.
- Primary responsibility included integrating Spotify API, allowing the user to login and gain a token that allows access to our SpotifySearch page.

Professional Work Experience

Currey & Company | Supply Chain Coordinator | Atlanta, GA Sep 2018 – June 2020

- Sourced and generated product data for 300+ SKU's bi-yearly and prepared data for upload to database.
- Used advanced Excel and SQL to manage parts inventory and new season introductions

Currey & Company | Product Development Coordinator | Atlanta June 2017 – May 2018

- Tracked, managed, and maintained product data from sample stage to product introduction

Velociteach | Market & Research Analyst | Atlanta, GA Oct 2016 – May 2017

- Collaborated with external marketing partners to analyze and leverage Google Analytics trends/data
- Conducted research for evidence-based decisions on various projects and synthesize information gathered to present recommendations to the Executive Vice President
